MSc Web Science & Big Data Analytics

Department of Computer Science

University College London

September 9, 2016

This report is submitted as part requirement for the MSc in Web Science & Big Data Analytics at University College London. It is substantially the result of my own work except where explicitly indicated in the text.

The report may be freely copied and distributed provided the source is explicitly acknowledged.

**This side is purposely left blank.**

# TABLE OF CONTENTS

<b>SUPPLEMENTARY MATERIAL</b>	<b>1</b>
<b>1 EPSRC grant data</b>	<b>1</b>
1.1 Networks of Topics . . . . .	1
1.1.1 Topic-grant network . . . . .	1
1.1.1.1 Current (2010 to 2016) data set . . . . .	8
1.1.1.2 Historical (2000 to 2010) data set . . . . .	41
1.1.1.3 Historical (1990 to 2000) data set . . . . .	55
1.1.2 Topic-researcher network . . . . .	66
1.1.2.1 Current (2010 to 2016) data set . . . . .	66
1.2 Networks of Researchers . . . . .	79
1.2.1 Researcher-grant network . . . . .	79
1.2.1.1 Current (2010 to 2016) data set . . . . .	79
1.2.1.2 Historical (2000 to 2010) data set . . . . .	242
1.2.1.3 Historical (1990 to 2000) data set . . . . .	601
1.2.2 Researcher-topic network . . . . .	897
1.2.2.1 Current (2010 to 2016) data set . . . . .	897

# LIST OF FIGURES

1.1	Word cloud representation based on word frequency showcasing words that formulate topics in the <i>Topic-grant</i> network . . . . .	8
1.2	Word cloud representation based on the number of grants containing the topics in the <i>Topic-grant</i> network . . . . .	8
1.3	Word cloud representation based on the value of grants containing the topics in the <i>Topic-grant</i> network . . . . .	9
1.4	Word cloud representation based on word frequency showcasing words that formulate topics clustered within Community 1 . . . . .	21
1.5	Word cloud representation based on the number of grants containing topics clustered within Community 1 . . . . .	21
1.6	Word cloud representation based on the value of grants containing topics clustered within Community 1 . . . . .	22
1.7	Word cloud representation based on the number of grants containing topics in sub-communities within Community 1 . . .	22
1.8	Word cloud representation based on the value of grants containing topics in sub-communities within Community 1 . . . .	23
1.9	Word cloud representation based on word frequency showcasing words that formulate topics clustered within Community 2 . . . . .	24
1.10	Word cloud representation based on the number of grants containing topics clustered within Community 2 . . . . .	24
1.11	Word cloud representation based on the value of grants containing topics clustered within Community 2 . . . . .	25
1.12	Word cloud representation based on the number of grants containing topics in sub-communities within Community 2 . .	25
1.13	Word cloud representation based on the value of grants containing topics in sub-communities within Community 2 . . . .	26

1.14 Word cloud representation based on word frequency showcasing words that formulate topics clustered within Community 3 . . . . .	28
1.15 Word cloud representation based on the number of grants containing topics clustered within Community 3 . . . . .	28
1.16 Word cloud representation based on the value of grants containing topics clustered within Community 3 . . . . .	29
1.17 Word cloud representation based on the number of grants containing topics in sub-communities within Community 3 . . . .	29
1.18 Word cloud representation based on the value of grants containing topics in sub-communities within Community 3 . . . .	30
1.19 Word cloud representation based on word frequency showcasing words that formulate topics clustered within Community 4 . . . . .	32
1.20 Word cloud representation based on the number of grants containing topics clustered within Community 4 . . . . .	32
1.21 Word cloud representation based on the value of grants containing topics clustered within Community 4 . . . . .	33
1.22 Word cloud representation based on the number of grants containing topics in sub-communities within Community 4 . . . .	33
1.23 Word cloud representation based on the value of grants containing topics in sub-communities within Community 4 . . . .	34
1.24 Word cloud representation based on word frequency showcasing words that formulate topics clustered within Community 5 . . . . .	35
1.25 Word cloud representation based on the number of grants containing topics clustered within Community 5 . . . . .	35
1.26 Word cloud representation based on the value of grants containing topics clustered within Community 5 . . . . .	36

1.27	Word cloud representation based on the number of grants containing topics in sub-communities within Community 5 . . .	36
1.28	Word cloud representation based on the value of grants containing topics in sub-communities within Community 5 . . . .	37
1.29	Word cloud representation based on word frequency showing words that formulate the topics clustered within Community 6 . . . . .	38
1.30	Word cloud representation based on the number of grants containing topics clustered within Community 6 . . . . .	38
1.31	Word cloud representation based on the value of grants containing topics clustered within Community 6 . . . . .	39
1.32	Word cloud representation based on the number of grants containing topics in sub-communities within Community 6 . . .	39
1.33	Word cloud representation based on the value of grants containing topics in sub-communities within Community 6 . . . .	40

# LIST OF TABLES

1.1	Topics in the current (2010-2016) data set that are not in the historical (2000 to 2010) data set . . . . .	1
1.2	Topics in the historical (2000 to 2010) data set that are not in the current (2010-2016) data set . . . . .	3
1.3	Topics in the historical (2000 to 2010) data set that are not in the historical (1990-2010) data set . . . . .	5
1.4	Topics and the number and value of grants that contain each topic in the <i>Topic-grant</i> network constructed using the current (2010 to 2016) data set . . . . .	9
1.5	Properties of the <i>Topic-grant</i> network constructed using the current (2010 to 2016) data set . . . . .	17
1.6	Number of communities and modularity score of the community structure identified within the <i>Topic-grant</i> network constructed using the current (2010 to 2016) data set . . . . .	18
1.7	Number of topics clustered within each community discovered in the <i>Topic-grant</i> network constructed using the current (2010 to 2016) data set . . . . .	18
1.8	Number and value of grants within each community discovered in the <i>Topic-grant</i> network constructed using the current (2010 to 2016) data set . . . . .	19
1.9	Total number and value of unique grants within communities, total number and value of unique grants within the network and total number and value of unique grants between communities discovered in the <i>Topic-grant</i> network constructed using the current (2010 to 2016) data set . . . . .	20

1.10 Topics clustered within each sub-community of Community 1 discovered by the optimal solution identified in the experiment on the <i>Topic-grant</i> network constructed using the current (2010 to 2016) data set . . . . .	23
1.11 Topics clustered within each sub-community of Community 2 discovered by the optimal solution identified in the experiment on the <i>Topic-grant</i> network constructed using the current (2010 to 2016) data set . . . . .	26
1.12 Topics clustered within each sub-community of Community 3 discovered by the optimal solution identified in the experiment on the <i>Topic-grant</i> network constructed using the current (2010 to 2016) data set . . . . .	30
1.13 Topics clustered within each sub-community of Community 4 discovered by the optimal solution identified in the experiment on the <i>Topic-grant</i> network constructed using the current (2010 to 2016) data set . . . . .	34
1.14 Topics clustered within each sub-community of Community 5 discovered by the optimal solution identified in the experiment on the <i>Topic-grant</i> network constructed using the current (2010 to 2016) data set . . . . .	37
1.15 Topics clustered within each sub-community of Community 6 discovered by the optimal solution identified in the experiment on the <i>Topic-grant</i> network constructed using the current (2010 to 2016) data set . . . . .	40
1.16 Topics and the number and value of grants that contain each topic in the <i>Topic-grant</i> network constructed using the historical (2000 to 2010) data set . . . . .	41
1.17 Properties of the <i>Topic-grant</i> network constructed using the historical (2000 to 2010) data set . . . . .	48

1.18	Number of communities and modularity score of the community structure identified within the <i>Topic-grant</i> network constructed using the historical (2000 to 2010) data set . . . . .	49
1.19	Number of topics clustered within each community discovered in the <i>Topic-grant</i> network constructed using the historical (2000 to 2010) data set . . . . .	49
1.20	Number and value of grants within each community discovered in the <i>Topic-grant</i> network constructed using the historical (2000 to 2010) data set . . . . .	50
1.21	Total number and value of unique grants within communities, total number and value of unique grants within the network and total number and value of unique grants between communities discovered in the <i>Topic-grant</i> network constructed using the historical (2000 to 2010) data set . . . . .	51
1.22	Topics clustered within each community and sub-community discovered in the <i>Topic-grant</i> network constructed using the historical (2000 to 2010) data set . . . . .	52
1.23	Topics and the number and value of grants that contain each topic in the <i>Topic-grant</i> network constructed using the historical (1990 to 2000) data set . . . . .	55
1.24	Properties of the <i>Topic-grant</i> network constructed using the historical (1990 to 2000) data set . . . . .	60
1.25	Number of communities and modularity score of the community structure identified within the <i>Topic-grant</i> network constructed using the historical (1990 to 2000) data set . . . . .	61
1.26	Number of topics clustered within each community discovered in the <i>Topic-grant</i> network constructed using the historical (1990 to 2000) data set . . . . .	61

1.27 Number and value of grants within each community discovered in the <i>Topic-grant</i> network constructed using the historical (1990 to 2000) data set . . . . .	62
1.28 Total number and value of unique grants within communities, total number and value of unique grants within the network and total number and value of unique grants between communities discovered in the <i>Topic-grant</i> network constructed using the historical (1990 to 2000) data set . . . . .	63
1.29 Topics clustered within each community and sub-community discovered in the <i>Topic-grant</i> network constructed using the historical (1990 to 2000) data set . . . . .	64
1.30 Topics and the number of researchers that contain each topic in the <i>Topic-researcher</i> network constructed using the current (2010 to 2016) data set . . . . .	66
1.31 Properties of the <i>Topic-researcher</i> network constructed using the current (2010 to 2016) data set . . . . .	74
1.32 Number of communities and modularity score of the community structure identified within the <i>Topic-researcher</i> network constructed using the current (2010 to 2016) data set . . . . .	75
1.33 Number of topics clustered within each community discovered in the <i>Topic-researcher</i> network constructed using the current (2010 to 2016) data set . . . . .	75
1.34 Topics clustered within each community and sub-community discovered in the <i>Topic-researcher</i> network constructed using the current (2010 to 2016) data set . . . . .	76
1.35 Researchers and the number and value of grants that contain each researcher in the <i>Researcher-grant</i> network constructed using the current (1990 to 2000) data set . . . . .	79
1.36 Properties of the <i>Researcher-grant</i> network constructed using the current (2010 to 2016) data set . . . . .	237

1.37 Number of communities and modularity score of the community structure identified within the <i>Researcher-grant</i> network constructed using the current (2010 to 2016) data set . . . . .	238
1.38 Number of researchers clustered within each community discovered in the <i>Researcher-grant</i> network constructed using the current (2010 to 2016) data set . . . . .	238
1.39 Number and value of grants within each community discovered in the <i>Researcher-grant</i> network constructed using the current (2010 to 2016) data set . . . . .	239
1.40 Total number and value of unique grants within communities, total number and value of unique grants within the network and total number and value of unique grants between communities discovered in the <i>Researcher-grant</i> network constructed using the current (2010 to 2016) data set . . . . .	240
1.41 Researchers clustered within each community and sub-community discovered in the <i>Researcher-grant</i> network constructed using the current (2010 to 2016) data set . . . . .	241
1.42 Researchers and the number and value of grants that contain each researcher in the <i>Researcher-grant</i> network constructed using the current (2000 to 2010) data set . . . . .	242
1.43 Properties of the <i>Researcher-grant</i> network constructed using the historical (2000 to 2010) data set . . . . .	597
1.44 Number of communities and modularity score of the community structure identified within the <i>Researcher-grant</i> network constructed using the historical (2000 to 2010) data set . . . . .	598
1.45 Number of researchers clustered within each community discovered in the <i>Researcher-grant</i> network constructed using the historical (2000 to 2010) data set . . . . .	598

1.46 Number and value of grants within each community discovered in the <i>Researcher-grant</i> network constructed using the historical (2000 to 2010) data set . . . . .	599
1.47 Total number and value of unique grants within communities, total number and value of unique grants within the network and total number and value of unique grants between communities discovered in the <i>Researcher-grant</i> network constructed using the historical (2000 to 2010) data set . . . . .	600
1.48 Researchers and the number and value of grants that contain each researcher in the <i>Researcher-grant</i> network constructed using the current (2000 to 2010) data set . . . . .	601
1.49 Properties of the <i>Researcher-grant</i> network constructed using the historical (1990 to 2000) data set . . . . .	893
1.50 Number of communities and modularity score of the community structure identified within the <i>Researcher-grant</i> network constructed using the historical (1990 to 2000) data set . . . . .	894
1.51 Number of researchers clustered within each community discovered in the <i>Researcher-grant</i> network constructed using the historical (1990 to 2000) data set . . . . .	894
1.52 Number and value of grants within each community discovered in the <i>Researcher-grant</i> network constructed using the historical (1990 to 2000) data set . . . . .	895
1.53 Total number and value of unique grants within communities, total number and value of unique grants within the network and total number and value of unique grants between communities discovered in the <i>Researcher-grant</i> network constructed using the historical (1990 to 2000) data set . . . . .	896
1.54 Researchers and the number of topics that they have worked on in <i>Researcher-topic</i> network constructed using the current (2010 to 2016) data set . . . . .	897

1.55 Properties of the <i>Researcher-topic</i> network constructed using the current (2010 to 2016) data set . . . . .	1081
1.56 Number of communities and modularity score of the commu- nity structure identified within the <i>Researcher-topic</i> network constructed using the current (2010 to 2016) data set . . . . .	1082
1.57 Number of researchers clustered within each community dis- covered in the <i>Researcher-topic</i> network constructed using the current (2010 to 2016) data set . . . . .	1082

## 1 EPSRC grant data

## 1.1 Networks of Topics

### 1.1.1 Topic-grant network

**Table 1.1:** Topics in the current (2010-2016) data set that are not in the historical (2000 to 2010) data set used to construct the *Topic-grant* network.

No.	Topics in 2010-2016 that are not in 2000 to 2010
1	animal organisms
2	behavioural & experimental eco
3	criminal law & criminology
4	criminology
5	industrial-org/occupational
6	political geography
7	ageing: chemistry/biochemistry
8	animal behaviour
9	biochemical engineering
10	biomedical sciences
11	climate & climate change
12	cognitive psychology
13	composition
14	computational linguistics
15	computational methods & tools
16	data handling & storage
17	development geography
18	developmental psychology
19	diamond light source
20	earth & environmental
21	earth engineering
22	environment & health
23	environmental economics
24	geohazards
25	governance
26	human geography (general)

**Table 1.1:** Continued from previous page.

No.	Topics in 2010-2016 that are not in 2000 to 2010
27	international law
28	international relations theory
29	knowledge management
30	land - ocean interactions
31	macro-molecular delivery
32	macroeconomics
33	marketing
34	mathematical & statistic psych
35	microeconomic theory
36	musical performance
37	novel industrial products
38	organisational studies
39	plant physiology
40	plant responses to environment
41	protein engineering
42	regional & extreme weather
43	research approaches
44	science & technology studies
45	social anthropology
46	social policy
47	social psychology
48	social theory
49	survey & monitoring
50	systems neuroscience
51	time-based media htp

**Table 1.2:** Topics in the historical (2000 to 2010) data set that are not in the current (2010-2016) data set used to construct the *Topic-grant* network.

No.	Topics in 2000 to 2010 that are not in 2010-2016
1	animal & human physiology
2	astron. & space sci. technol.
3	cultural history
4	cultural studies & pop culture
5	interpreting & translation
6	publishing
7	accelerator r&d
8	agricultural systems
9	applied linguistics
10	archaeology of literate soc.
11	bionanoscience
12	bionanotechnology
13	cell cycle
14	combinatorial chemistry
15	crop science
16	design htp
17	drama & theatre - other
18	economic & social history
19	environmental informatics
20	escience
21	galactic & interstellar astron
22	human geography
23	language acquisition
24	language training/educational
25	languages & linguistics
26	mantle & core processes
27	mining & minerals extraction
28	musculoskeletal system
29	nuclear structure
30	policy, arts mgmt & creat ind
31	psycholinguistics
32	safety & reliability of plant

**Table 1.2:** Continued from previous page.

No.	Topics in 2000 to 2010 that are not in 2010-2016
33	science-based archaeology
34	sociolinguistics
35	stem cell biology
36	upper atmos process & geospace

**Table 1.3:** Topics in the historical (2000 to 2010) data set that are not in the historical (1990-2010) data set used to construct the *Topic-grant* network. All topics in the historical (1990 to 2000) data set are also in the historical (2000 to 2010) data set.

No.	Topics in 2000 to 2010 that are not in 1990 to 2000
1	accelerator r&d
2	agricultural systems
3	animal & human physiology
4	applied arts htp
5	applied linguistics
6	archaeology of literate soc.
7	astron. & space sci. technol.
8	bioinformatics
9	biological membranes
10	biomechanics & rehabilitation
11	biomedical neuroscience
12	bionanoscience
13	bionanotechnology
14	biophysics
15	carbon capture & storage
16	cell cycle
17	complexity science
18	comput./corpus linguistics
19	computer sys. & architecture
20	crop science
21	cultural history
22	cultural studies & pop culture
23	design htp
24	digital art & design
25	digital arts htp
26	drama & theatre - other
27	economic & social history
28	economics
29	education
30	energy - marine & hydropower

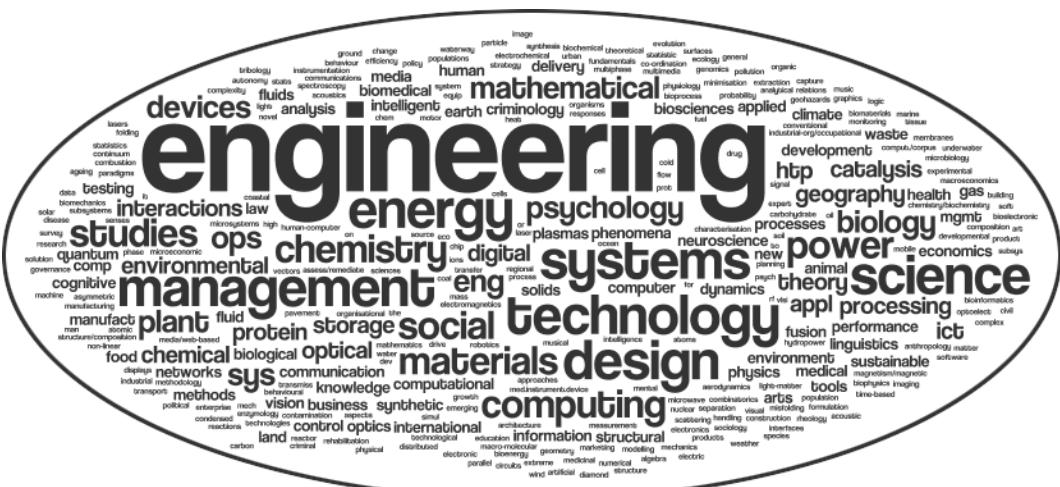

**Table 1.3:** Continued from previous page.

No.	Topics in 2000 to 2010 that are not in 1990 to 2000
31	environmental informatics
32	environmental planning
33	escience
34	evolution & populations
35	food processing
36	food structure/composition
37	fusion
38	galactic & interstellar astron
39	genomics
40	high performance computing
41	human geography
42	interpreting & translation
43	language acquisition
44	language training/educational
45	languages & linguistics
46	management & business studies
47	mantle & core processes
48	media & communication studies
49	medical imaging
50	mental health
51	microbiology
52	musculoskeletal system
53	new & emerging comp. paradigms
54	new media/web-based studies
55	policy, arts mgmt & creat ind
56	pollution
57	product design
58	protein chemistry
59	protein folding / misfolding
60	psycholinguistics
61	psychology
62	publishing

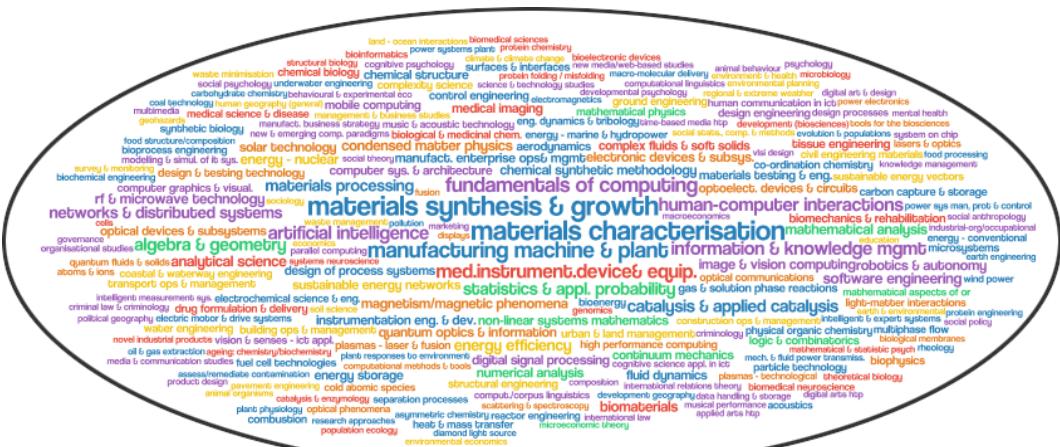

**Table 1.3:** Continued from previous page.

No.	Topics in 2000 to 2010 that are not in 1990 to 2000
63	science-based archaeology
64	social stats., comp. & methods
65	sociolinguistics
66	sociology
67	soil science
68	stem cell biology
69	structural biology
70	structural engineering
71	synthetic biology
72	upper atmos process & geospace

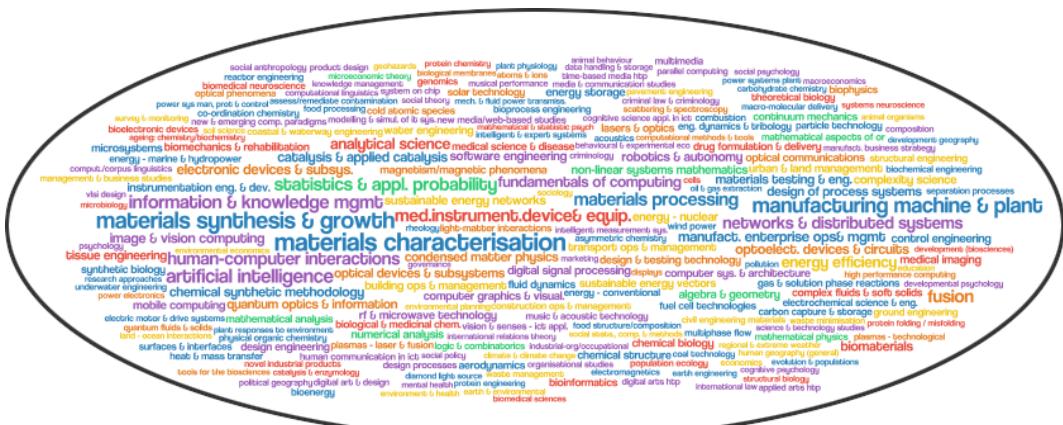

#### 1.1.1.1 Current (2010 to 2016) data set

**Figure 1.1:** Word cloud representation showcasing words that formulate topics in the *Topic-grant* network constructed using the current (2010 to 2016) data set. Font size represents of word frequency within the the text corpus.

**Figure 1.2:** Word cloud representation showcasing the topics in the *Topic-grant* network constructed using the current (2010 to 2016) data set. Font size represents the number of grants each topic appears in.

**Figure 1.3:** Word cloud representation showcasing the topics in the *Topic-grant* network constructed using the current (2010 to 2016) data set. Font size represents the number of grants each topic appears in.

**Table 1.4:** Topics and the number and value of grants that contain each topic sorted by the number of grants (largest to smallest) in the *Topic-grant* network constructed using the current (2010 to 2016) data set

No.	Topic	Number of Grants	Value of Grants
1	materials synthesis & growth	273	£305,344,034.00
2	materials characterisation	270	£350,845,612.00
3	manufacturing machine & plant	196	£273,265,770.00
4	fundamentals of computing	175	£140,728,848.00
5	med.instrument.device& equip.	155	£192,497,214.00
6	human-computer interactions	147	£193,369,943.00
7	artificial intelligence	146	£231,826,208.00
8	information & knowledge mgmt	141	£211,234,642.00
9	algebra & geometry	131	£69,459,955.00
10	catalysis & applied catalysis	124	£116,914,672.00
11	statistics & appl. probability	120	£200,779,552.00
12	networks & distributed systems	110	£177,563,885.00
13	materials processing	108	£203,775,655.00
14	energy efficiency	100	£150,990,954.00
15	analytical science	90	£145,977,721.00
16	software engineering	87	£92,094,590.00
17	mathematical analysis	86	£56,207,447.00
18	condensed matter physics	82	£97,207,707.00

**Table 1.4:** Continued from previous page.

No.	Topic	Number of Grants	Value of Grants
19	biomaterials	81	£101,030,647.00
20	rf & microwave technology	81	£71,900,374.00
21	energy - nuclear	79	£77,162,994.00
22	robotics & autonomy	77	£93,009,453.00
23	image & vision computing	74	£116,964,229.00
24	magnetism/magnetic phenomena	74	£61,078,943.00
25	chemical synthetic methodology	72	£101,788,856.00
26	electronic devices & subsys.	72	£123,197,049.00
27	numerical analysis	68	£68,652,593.00
28	quantum optics & information	68	£99,752,497.00
29	energy storage	65	£71,775,478.00
30	instrumentation eng. & dev.	65	£68,148,151.00
31	manufact. enterprise ops& mgmt	65	£119,063,980.00
32	non-linear systems mathematics	62	£75,268,389.00
33	sustainable energy networks	62	£91,222,489.00
34	digital signal processing	61	£74,370,433.00
35	fluid dynamics	61	£51,953,657.00
36	solar technology	61	£40,262,413.00
37	medical imaging	60	£73,682,425.00
38	continuum mechanics	57	£56,547,841.00
39	materials testing & eng.	57	£94,707,839.00

	<b>FG</b>	3070 £3.53B	3103 £3.56B	33 £23M

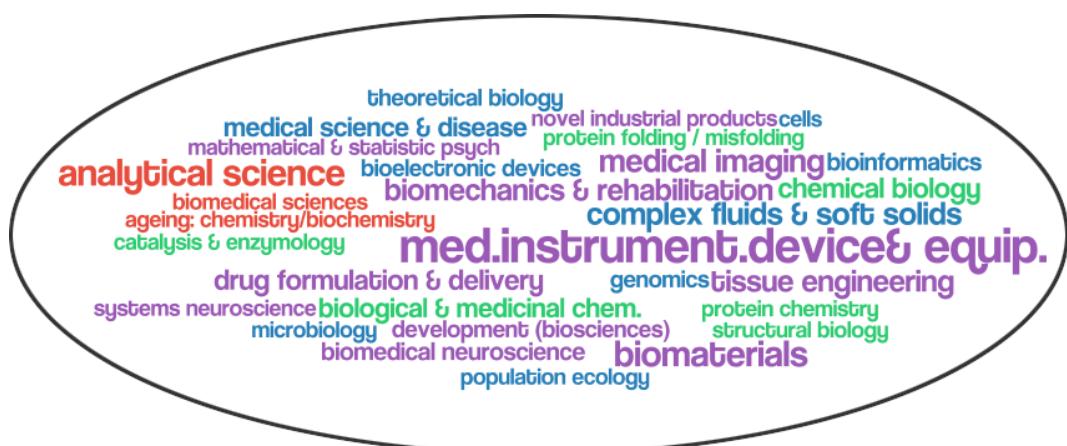

**Figure 1.4:** Word cloud representation showcasing words that formulate the topics clustered within Community 1 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the frequency of the word in the text corpus made out of all the words that formulate the topics clustered in Community 1.

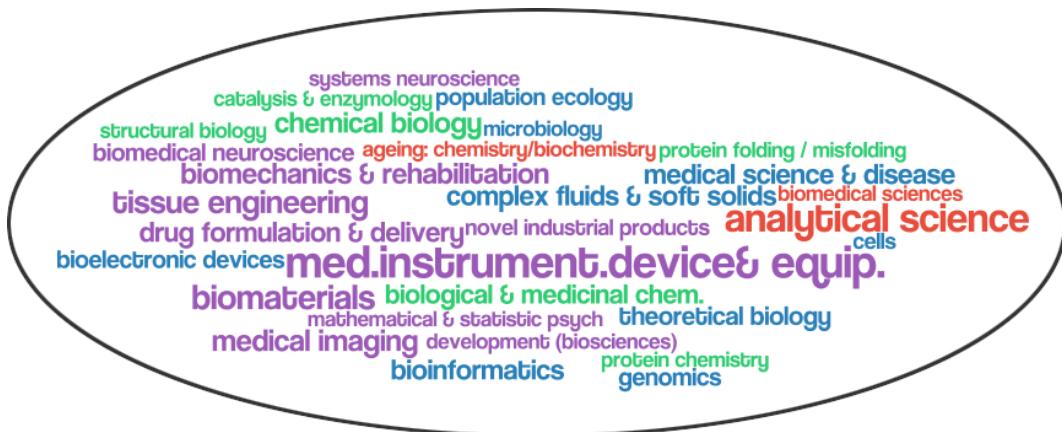

**Figure 1.5:** Word cloud representation showcasing topics clustered within Community 1 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the number of grants each topic appears in.

**Figure 1.6:** Word cloud representation showcasing topics clustered within Community 1 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the value of grants each topic appears in.

**Figure 1.7:** Word cloud representation showcasing topics in sub-communities within Community 1 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the number of grants each topics appears in, while text colour represents the sub-communities identified within Community 1.

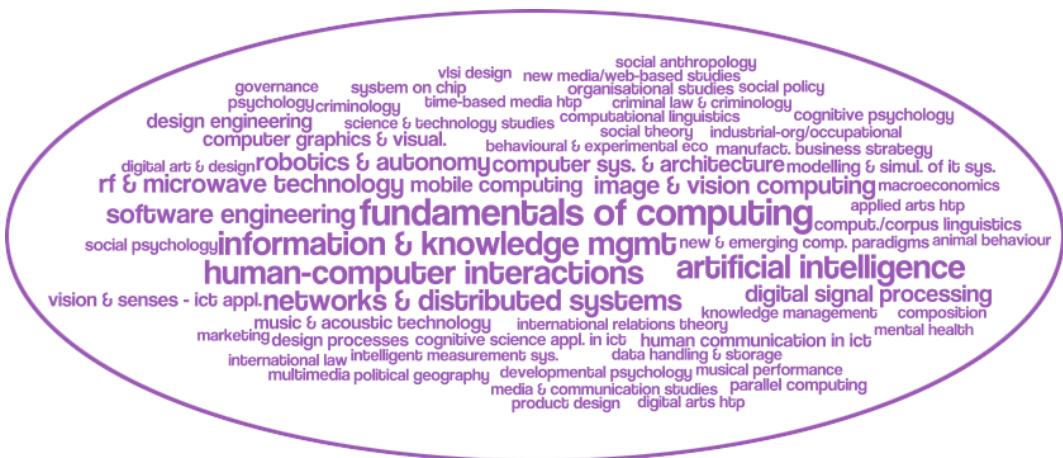

**Figure 1.8:** Word cloud representation showcasing topics in sub-communities within Community 1 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the value of grants each topic appears in, while text colour represents the sub-communities identified within Community 1.

**Table 1.10:** Topics clustered within each sub-community of Community 1 discovered by the optimal solution identified in the experiment on the *Topic-grant* network constructed using the current (2010 to 2016) data set. C1 stands for Community 1. Rows representing sub-communities are named using second-level labels (1.1, 1.2 and so on).

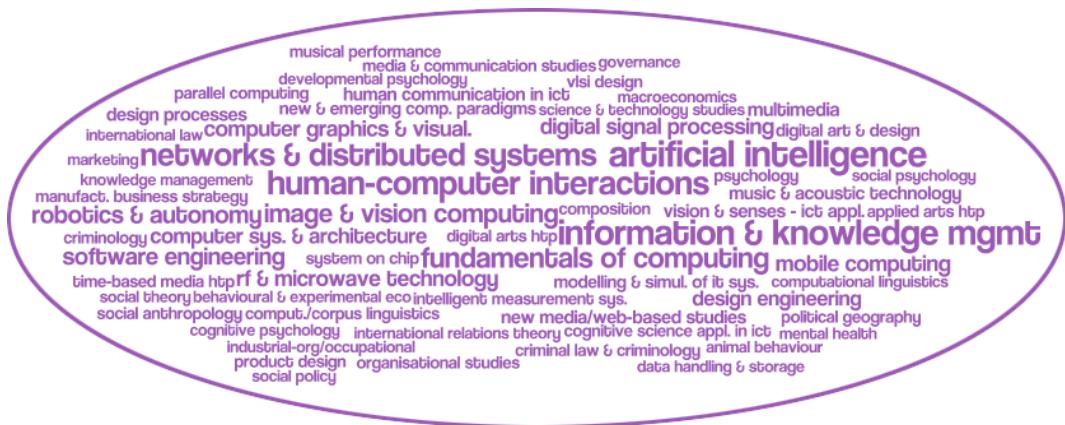

C1	1.1	ageing: chemistry/biochemistry, analytical science, biomedical sciences
	1.2	biomaterials, med.instrument.device& equip., biomechanics & rehabilitation, medical imaging, biomedical neuroscience, novel industrial products, development (biosciences), systems neuroscience, drug formulation & delivery, tissue engineering, mathematical & statistic psych
	1.3	drug formulation & delivery, tissue engineering, mathematical & statistic psych, bioelectronic devices, medical science & disease, bioinformatics, microbiology, cells, population ecology, complex fluids & soft solids, theoretical biology, genomics
	1.4	biological & medicinal chem., protein chemistry, catalysis & enzymology, protein folding / misfolding, chemical biology, structural biology

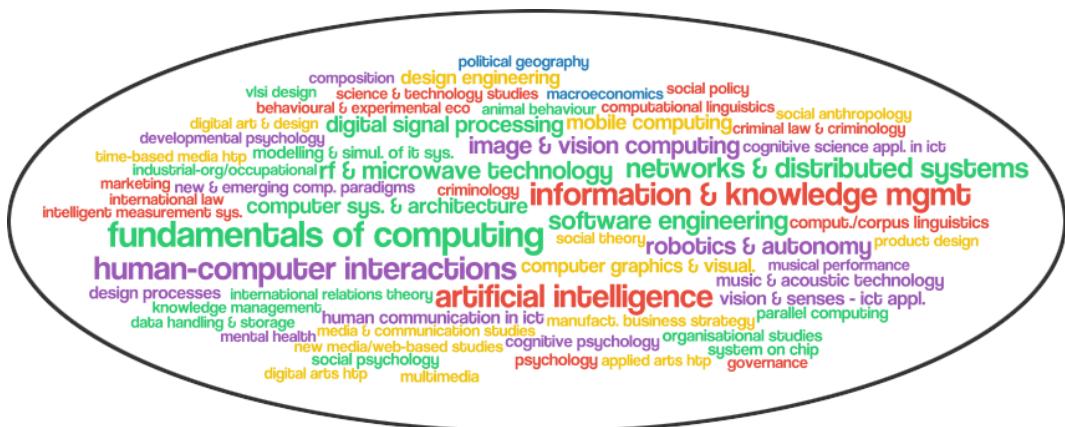

**Figure 1.9:** Word cloud representation showcasing words that formulate the topics clustered within Community 2 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the frequency of the word in the text corpus made out of all the words that formulate the topics clustered in Community 2.

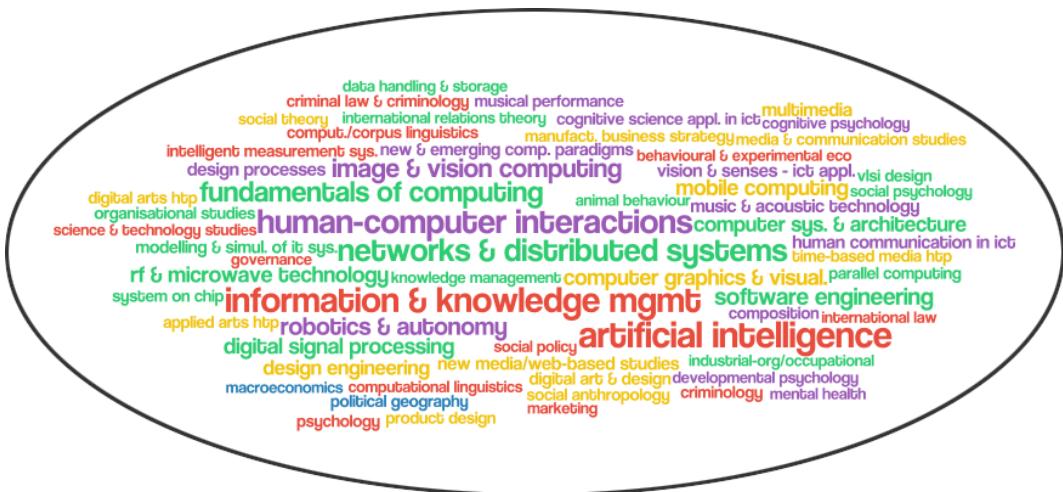

**Figure 1.10:** Word cloud representation showcasing topics clustered within Community 2 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the number of grants each topic appears in.

**Figure 1.11:** Word cloud representation showcasing topics clustered within Community 2 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the number of grants each topic appears in.

**Figure 1.12:** Word cloud representation showcasing topics in sub-communities within Community 2 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the number of grants each topic appears in, while text colour represents the sub-communities identified within Community 2.

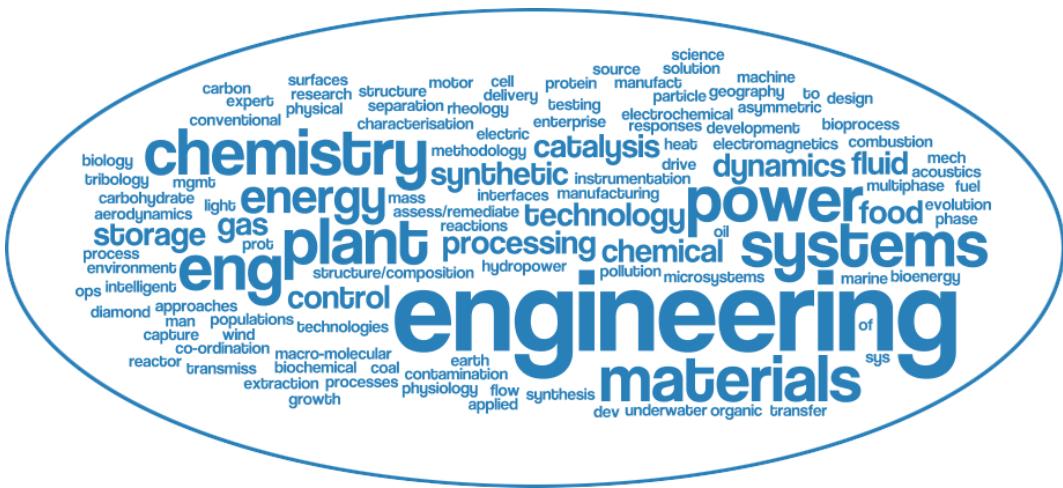

**Figure 1.13:** Word cloud representation showcasing topics in sub-communities within Community 2 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the value of grants containing a specific topic, while text colour represents the sub-communities identified within Community 2.

**Table 1.11:** Topics clustered within each sub-community of Community 2 discovered by the optimal solution identified in the experiment on the *Topic-grant* network constructed using the current (2010 to 2016) data set. **C2** for Community 2. Rows representing sub-communities are named using second-level labels (2.1, 2.2 and so on).

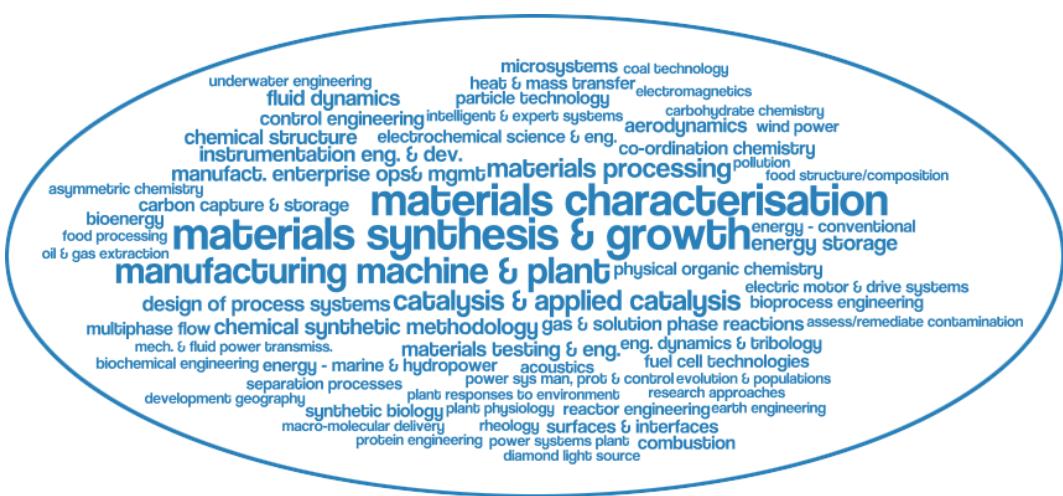

<b>C2</b>	<b>2.1</b>	artificial intelligence, information & knowledge mgmt, behavioural & experimental eco, intelligent measurement sys., comput./corpus linguistics, international law, computational linguistics, marketing, criminal law & criminology, psychology, criminology, science & technology studies, governance, social policy
	<b>2.2</b>	cognitive psychology, image & vision computing, cognitive science appl. in ict, mental health, composition, music & acoustic technology, design processes, musical performance, developmental psychology, new & emerging comp. paradigms, human communication in ict, robotics & autonomy, human-computer interactions, vision & senses - ict appl.
	<b>2.3</b>	macroeconomics, political geography
	<b>2.4</b>	animal behaviour, networks & distributed systems, computer sys. & architecture, organisational studies, data handling & storage, parallel computing, digital signal processing, rf & microwave technology, fundamentals of computing, social psychology, industrial-org/occupational, software engineering, international relations theory, system on chip, knowledge management, vlsi design, modelling & simul. of it sys.

**Table 1.11:** Continued from previous page.

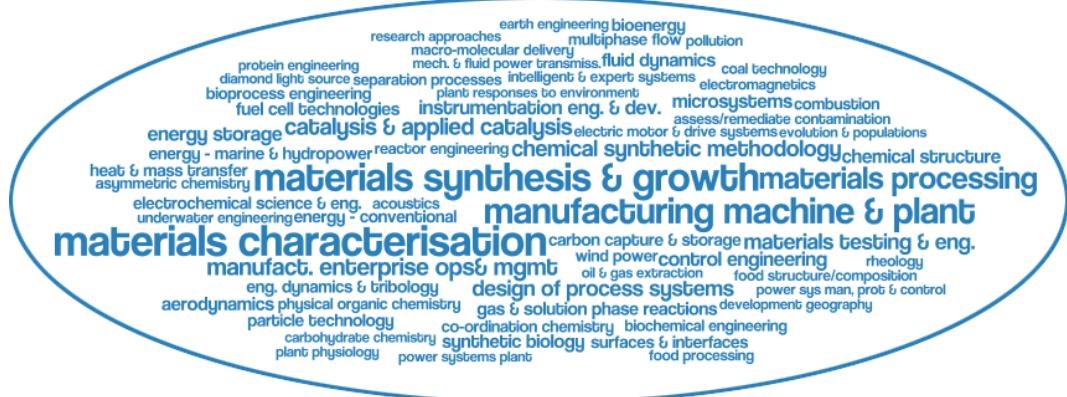

2.5	applied arts htp, mobile computing, computer graphics & visual., multimedia, design engineering, new media/web-based studies, digital art & design, product design, digital arts htp, social anthropology, manufact. business strategy, social theory, media & communication studies, time-based media htp

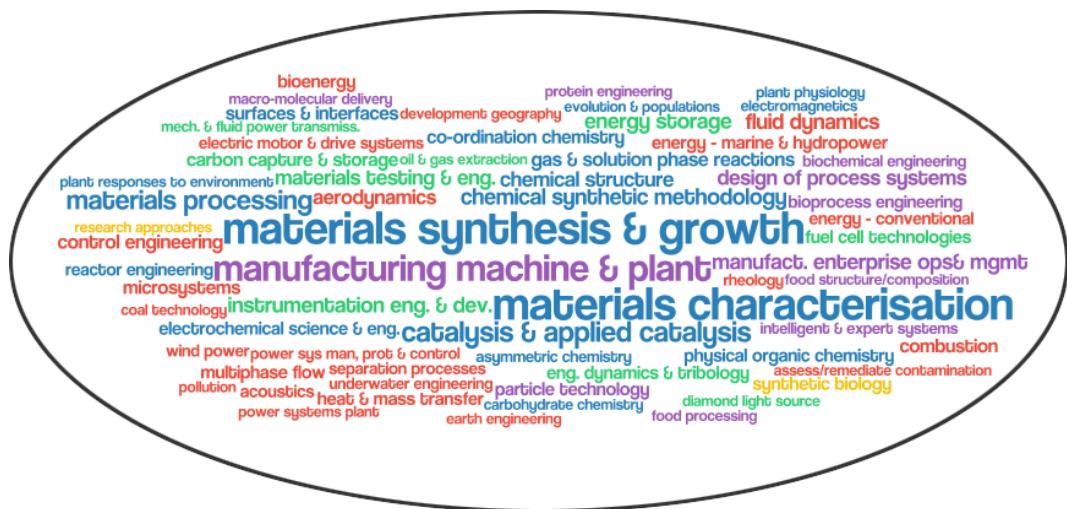

**Figure 1.14:** Word cloud representation showcasing words that formulate topics clustered within Community 1 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the frequency of the word in the text corpus made out of all the words that formulate the topics clustered in Community 3.

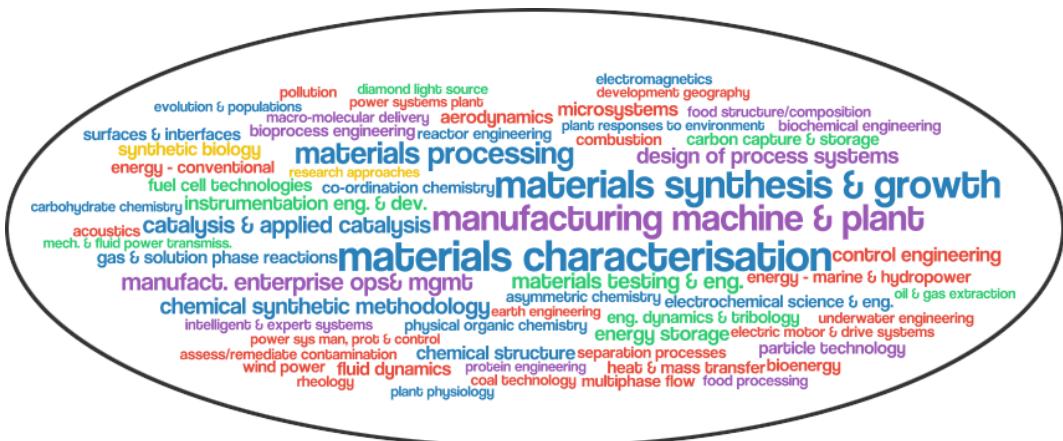

**Figure 1.15:** Word cloud representation showcasing topics clustered within Community 3 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the number of grants each topic appears in.

**Figure 1.16:** Word cloud representation showcasing topics clustered within Community 3 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the number of grants each topic appears in.

**Figure 1.17:** Word cloud representation showcasing topics in sub-communities within Community 3 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the number of grants each topic appears in, while text colour represents the sub-communities identified within Community 3.

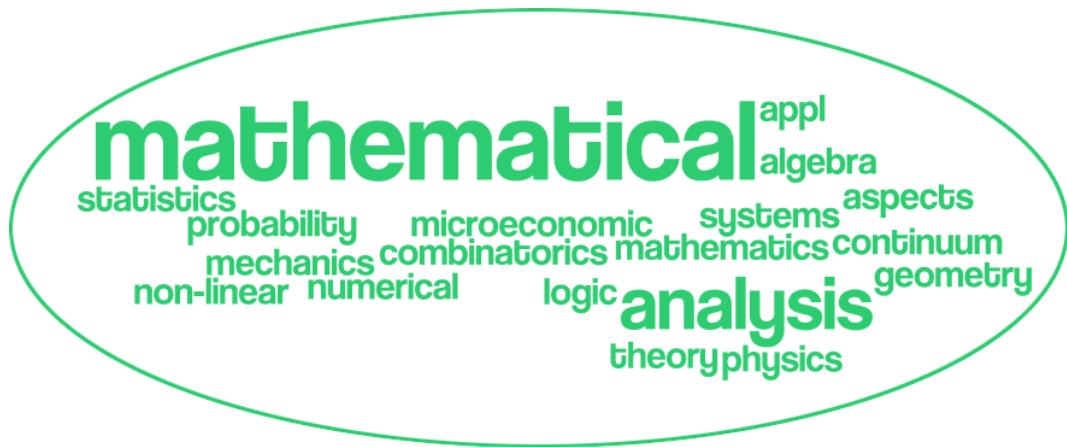

**Figure 1.18:** Word cloud representation showcasing topics in sub-communities within Community 3 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the value of grants containing a specific topic, while text colour represents the sub-communities identified within Community 3.

**Table 1.12:** Topics clustered within each sub-community of Community 3 discovered by the optimal solution identified in the experiment on the *Topic-grant* network constructed using the current (2010 to 2016) data set. C3 stands for Community 3. Rows representing sub-communities are named using second-level labels (3.1, 3.2 and so on).

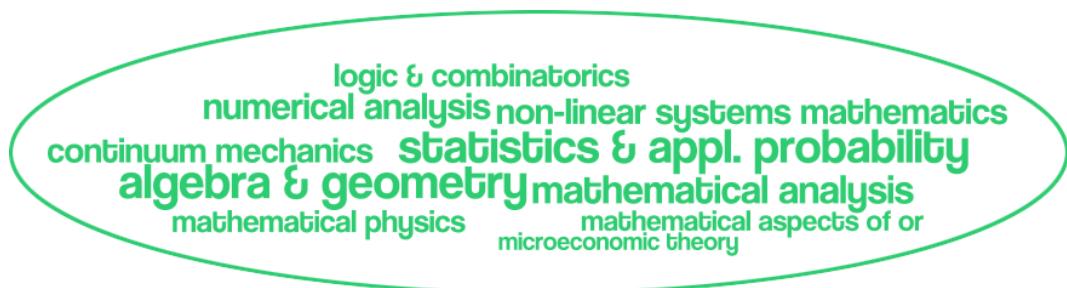

C3	3.1	acoustics, fluid dynamics, aerodynamics, heat & mass transfer, assess/remediate contamination, microsystems, bioenergy, multiphase flow, coal technology, pollution, combustion, power sys man, prot & control, control engineering, power systems plant, development geography, rheology, earth engineering, separation processes, electric motor & drive systems, underwater engineering, energy - conventional, wind power, energy - marine & hydropower
	3.2	biochemical engineering, macro-molecular delivery, bioprocess engineering, manufact. enterprise ops& mgmt, design of process systems, manufacturing machine & plant, food processing, particle technology, food structure/composition, protein engineering, intelligent & expert systems
	3.3	asymmetric chemistry, gas & solution phase reactions, carbohydrate chemistry, materials characterisation, catalysis & applied catalysis, materials processing, chemical structure, materials synthesis & growth, chemical synthetic methodology, physical organic chemistry, co-ordination chemistry, plant physiology, electrochemical science & eng., plant responses to environment, electromagnetics, reactor engineering, evolution & populations, surfaces & interfaces

**Table 1.12:** Continued from previous page.

	<b>3.4</b>	carbon capture & storage, instrumentation eng. & dev., diamond light source, materials testing & eng., energy storage, mech. & fluid power transmiss., eng. dynamics & tribology, oil & gas extraction, fuel cell technologies
	<b>3.5</b>	research approaches, synthetic biology

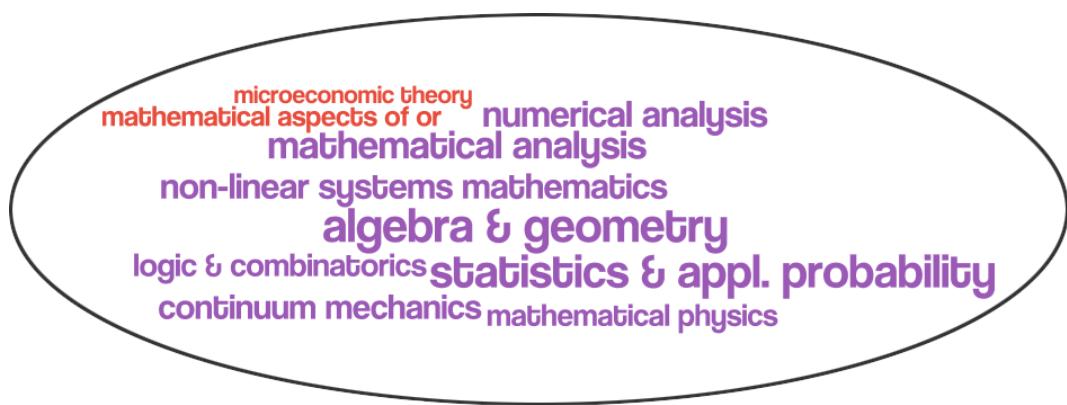

**Figure 1.19:** Word cloud representation showcasing words that formulate topics clustered within Community 4 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the frequency of the word in the text corpus made out of all the words that formulate the topics clustered in Community 4.

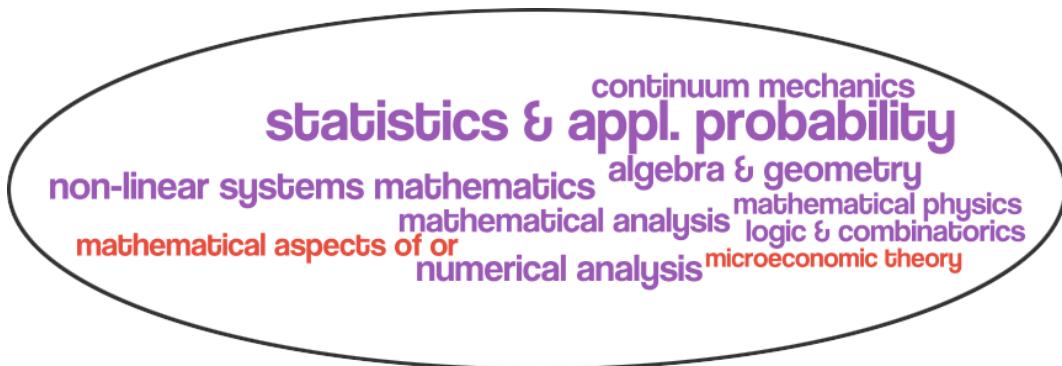

**Figure 1.20:** Word cloud representation showcasing topics clustered within Community 4 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the number of grants each topic appears in.

**Figure 1.21:** Word cloud representation showcasing topics clustered within Community 4 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the number of grants each topic appears in.

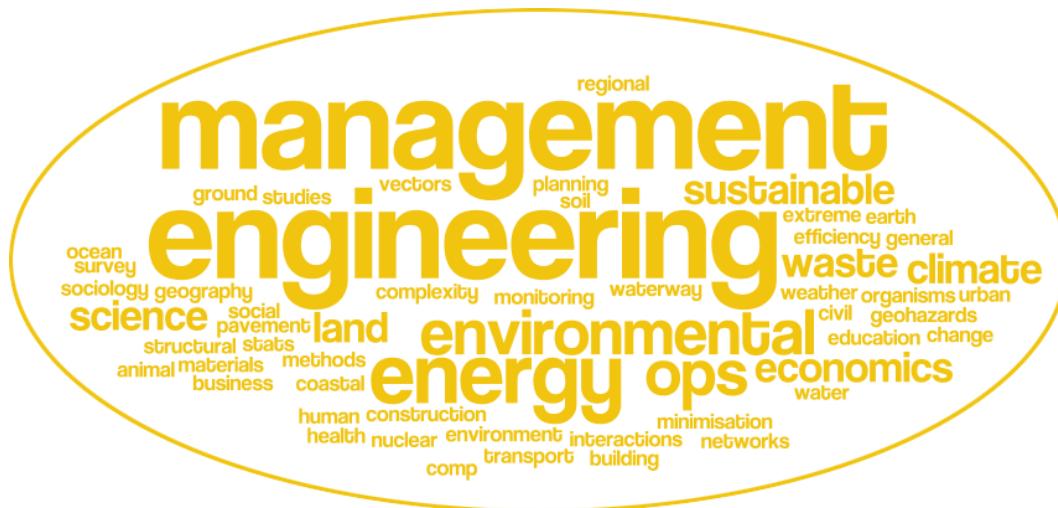

**Figure 1.22:** Word cloud representation showcasing topics in sub-communities within Community 4 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the number of grants each topic appears in, while text colour represents the sub-communities identified within Community 4.

**Figure 1.23:** Word cloud representation showcasing topics in sub-communities within Community 4 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the value of grants containing a specific topic, while text colour represents the sub-communities identified within Community 4.

**Table 1.13:** Topics clustered within each sub-community of Community 4 discovered by the optimal solution identified in the experiment on the *Topic-grant* network constructed using the current (2010 to 2016) data set. C4 stands for Community 4. Rows representing sub-communities are named using second-level labels (4.1, 4.2 and so on).

<b>C4</b>	<b>4.1</b>	mathematical aspects of or, microeconomic theory
	<b>4.2</b>	algebra & geometry, mathematical physics, continuum mechanics, non-linear systems mathematics, logic & combinatorics, numerical analysis, mathematical analysis, statistics & appl. probability

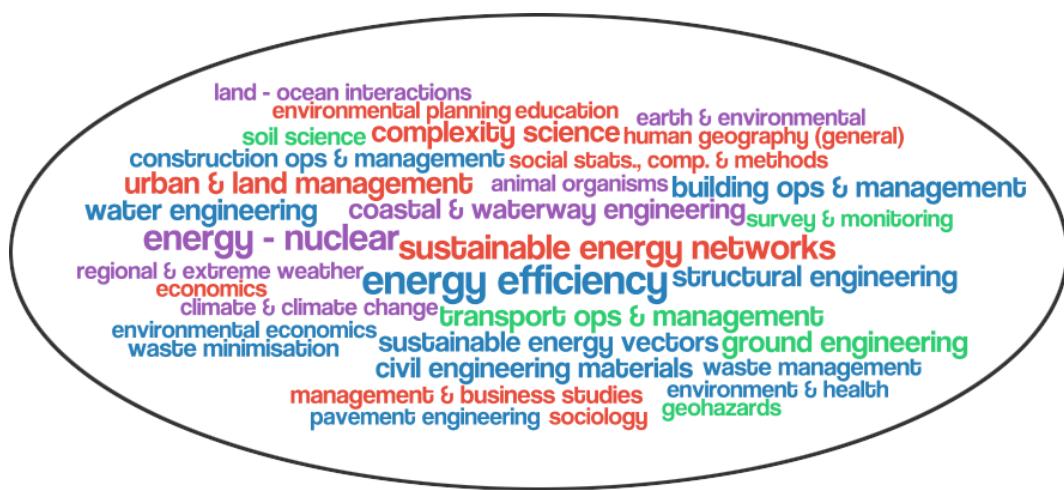

**Figure 1.24:** Word cloud representation showcasing words that formulate topics clustered within Community 5 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the frequency of the word in the text corpus made out of all the words that formulate the topics clustered in Community 5.

**Figure 1.25:** Word cloud representation showcasing topics clustered within Community 5 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the number of grants each topic appears in.

**Figure 1.26:** Word cloud representation showcasing topics clustered within Community 5 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the number of grants each topic appears in.

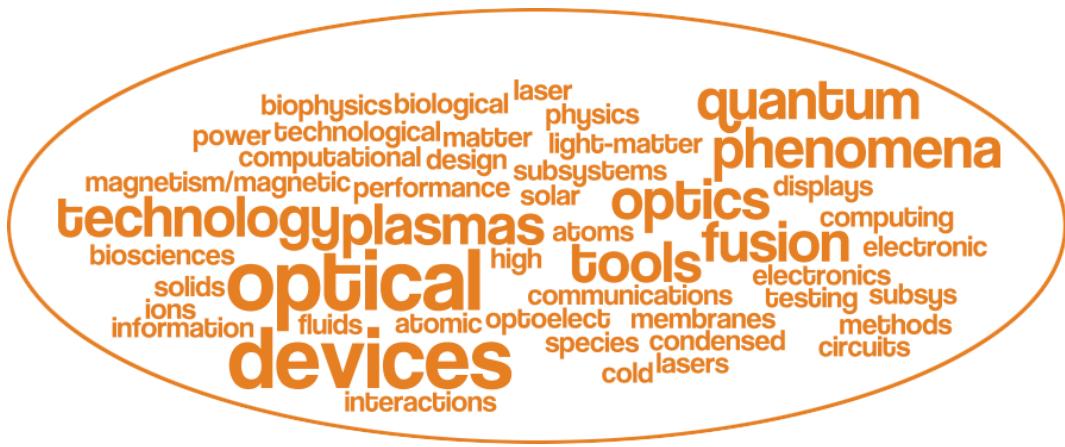

**Figure 1.27:** Word cloud representation showcasing topics in sub-communities within Community 5 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the number of grants each topic appears in, while text colour represents the sub-communities identified within Community 5.

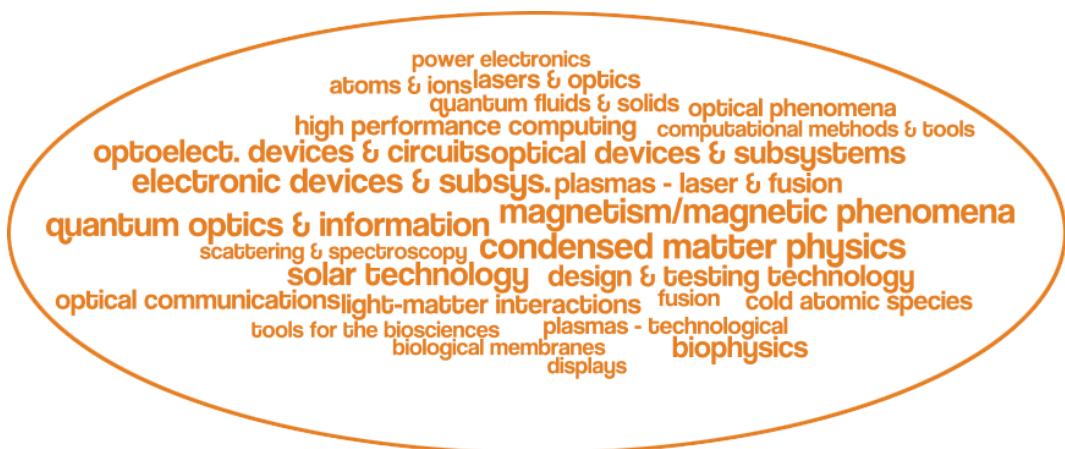

**Figure 1.28:** Word cloud representation showcasing topics in sub-communities within Community 5 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the value of grants containing a specific topic, while text colour represents the sub-communities identified within Community 5.

**Table 1.14:** Topics clustered within each sub-community of Community 5 discovered by the optimal solution identified in the experiment on the *Topic-grant* network constructed using the current (2010 to 2016) data set. C5 stands for Community 5. Rows representing sub-communities are named using second-level labels (5.1, 5.2 and so on).

C5	5.1	complexity science, management & business studies, economics, social stats., comp. & methods, education, sociology, environmental planning, sustainable energy networks, human geography (general), urban & land management
	5.2	animal organisms, energy - nuclear, climate & climate change, land - ocean interactions, coastal & waterway engineering, regional & extreme weather, earth & environmental
	5.3	building ops & management, pavement engineering, civil engineering materials, structural engineering, construction ops & management, sustainable energy vectors, energy efficiency, waste management, environment & health, waste minimisation, environmental economics, water engineering
	5.4	geohazards, survey & monitoring, ground engineering, transport ops & management, soil science

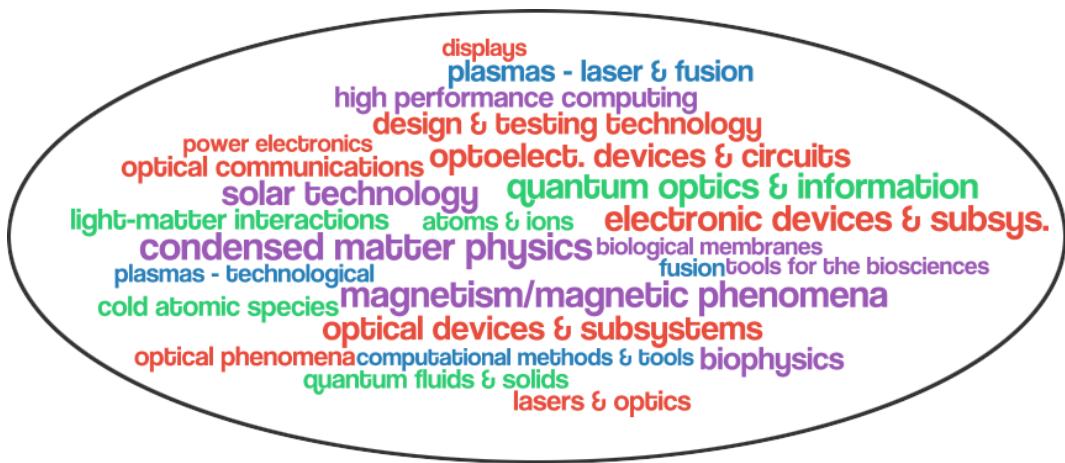

**Figure 1.29:** Word cloud representation showcasing words that formulate topics clustered within Community 6 by the optimal solution identified in the experiment on the *Topic-grant* network constructed using the current (2010 to 2016) data set. Font size represents the frequency of the word in the text corpus made out of all the words that formulate the topics clustered in Community 6.

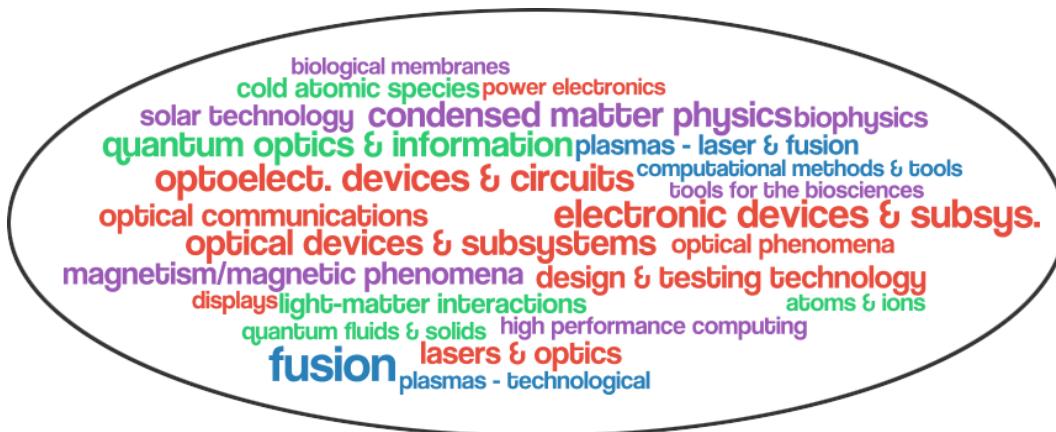

**Figure 1.30:** Word cloud representation showcasing topics clustered within Community 6 by the optimal solution identified in the experiment on the *Topic-grant* network constructed using the current (2010 to 2016) data set. Font size represents the number of grants each topic appears in.

**Figure 1.31:** Word cloud representation showcasing topics clustered within Community 6 by the optimal solution identified in the experiment on the *Topic-grant* network constructed using the current (2010 to 2016) data set. Font size represents the number of grants each topic appears in.

**Figure 1.32:** Word cloud representation showcasing topics in sub-communities within Community 6 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the number of grants each topic appears in, while text colour represents the sub-communities identified within Community 6.

**Figure 1.33:** Word cloud representation showcasing topics in sub-communities within Community 6 in the *Topic-grant* network by the optimal solution identified in the experiment. Font size represents the value of grants containing a specific topic, while text colour represents the sub-communities identified within Community 6.

**Table 1.15:** Topics clustered within each sub-community of Community 6 discovered by the optimal solution identified in the experiment on the *Topic-grant* network constructed using the current (2010 to 2016) data set. C6 stands for Community 6. Rows representing sub-communities are named using second-level labels (6.1, 6.2 and so on).

C6	6.1	design & testing technology, optical devices & subsystems, displays, optical phenomena, electronic devices & subsys., optoelect. devices & circuits, lasers & optics, power electronics, optical communications
	6.2	biological membranes, magnetism / magnetic phenomena, biophysics, solar technology, condensed matter physics, tools for the biosciences, high performance computing
	6.3	computational methods & tools, plasmas - laser & fusion, fusion, plasmas - technological
	6.4	atoms & ions, quantum fluids & solids, cold atomic species, quantum optics & information, light-matter interactions, scattering & spectroscopy

### 1.1.1.2 Historical (2000 to 2010) data set

**Table 1.16:** Topics and the number and value of grants that contain each topic sorted by the number of grants (largest to smallest) in the *Topic-grant* network constructed using the historical data set (v to 2010)

No.	Topic	Number of Grants	Value of Grants
1	materials characterisation	2389	£759,734,489.00
2	materials synthesis & growth	1173	£430,639,300.00
3	materials processing	899	£320,041,055.00
4	chemical synthetic methodology	833	£228,631,699.00
5	fundamentals of computing	673	£137,993,580.00
6	instrumentation eng. & dev.	569	£223,201,085.00
7	algebra & geometry	558	£87,645,143.00
8	catalysis & applied catalysis	534	£128,331,364.00
9	chemical structure	518	£163,434,000.00
10	networks & distributed systems	471	£191,491,096.00
11	image & vision computing	444	£142,156,888.00
12	surfaces & interfaces	442	£189,026,023.00
13	information & knowledge mgmt	428	£207,334,615.00
14	artificial intelligence	424	£113,099,037.00
15	condensed matter physics	414	£159,648,712.00
16	materials testing & eng.	411	£179,320,340.00
17	non-linear systems mathematics	404	£83,766,241.00
18	mathematical analysis	397	£68,015,950.00
19	biological & medicinal chem.	392	£156,620,153.00
20	electronic devices & subsys.	380	£187,642,388.00
21	chemical biology	377	£146,872,141.00
22	software engineering	369	£126,787,838.00
23	numerical analysis	356	£75,426,513.00
24	analytical science	352	£127,585,114.00
25	optical devices & subsystems	319	£160,108,893.00
26	statistics & appl. probability	318	£79,699,402.00
27	med.instrument.device& equip.	314	£149,512,248.00
28	complex fluids & soft solids	308	£101,368,533.00
29	lasers & optics	305	£114,747,052.00

**Table 1.16:** Continued from previous page.

No.	Topic	Number of Grants	Value of Grants
30	continuum mechanics	303	£52,884,668.00
31	eng. dynamics & tribology	295	£105,820,527.00
32	human-computer interactions	294	£133,564,251.00
33	biomaterials	290	£102,615,189.00
34	medical science & disease	279	£104,492,024.00
35	mathematical physics	263	£50,724,586.00
36	transport ops & management	261	£101,968,674.00
37	gas & solution phase reactions	260	£87,744,036.00
38	rf & microwave technology	256	£99,319,921.00
39	control engineering	254	£123,237,305.00
40	optoelect. devices & circuits	254	£138,710,965.00
41	digital signal processing	248	£76,784,917.00
42	system on chip	240	£123,255,458.00
43	building ops & management	235	£93,514,233.00
44	combustion	230	£62,256,796.00
45	aerodynamics	227	£68,273,323.00
46	fluid dynamics	216	£68,289,650.00
47	construction ops & management	210	£106,725,995.00
48	civil engineering materials	204	£67,313,044.00
49	tissue engineering	203	£75,273,733.00
50	co-ordination chemistry	202	£52,721,606.00
51	manufact. enterprise ops& mgmt	190	£97,964,202.00
52	logic & combinatorics	189	£38,070,447.00
53	reactor engineering	181	£38,913,260.00
54	energy efficiency	180	£92,407,766.00
55	coastal & waterway engineering	179	£41,536,247.00
56	ground engineering	179	£39,464,108.00
57	multiphase flow	177	£58,497,558.00
58	water engineering	177	£50,898,445.00
59	cells	173	£82,995,878.00
60	solar technology	166	£82,482,682.00
61	mobile computing	165	£99,965,326.00

**Table 1.16:** Continued from previous page.

No.	Topic	Number of Grants	Value of Grants
62	acoustics	163	£42,759,760.00
63	design of process systems	163	£78,410,261.00
64	mathematical aspects of or	163	£62,084,009.00
65	new & emerging comp. paradigms	158	£54,258,668.00
66	quantum optics & information	156	£75,409,081.00
67	asymmetric chemistry	155	£29,828,358.00
68	electrochemical science & eng.	154	£49,154,033.00
69	optical communications	152	£75,655,526.00
70	vision & senses - ict appl.	151	£30,289,567.00

	<b>5.4</b>	accelerator r&d, escience, agricultural systems, human communication in ict, applied linguistics, human geography, archaeology of literate soc., human-computer interactions, comput./corpus linguistics, interpreting & translation, computer graphics & visual., medical imaging, drama & theatre - other, psycholinguistics, education, science-based archaeology, environmental informatics, sociolinguistics, environmental planning

### 1.1.1.3 Historical (1990 to 2000) data set

**Table 1.23:** Topics and the number and value of grants that contain each topic sorted by the number of grants (largest to smallest) in the *Topic-grant* network constructed using the historical (1990 to 2000) data set

No.	Topic	Number of Grants	Value of Grants
1	materials characterisation	1437	£250,687,834.00
2	materials processing	748	£203,166,413.00
3	materials synthesis & growth	628	£145,266,958.00
4	instrumentation eng. & dev.	479	£86,796,767.00
5	chemical synthetic methodology	470	£51,412,325.00
6	condensed matter physics	372	£95,053,530.00
7	civil engineering materials	294	£25,079,586.00
8	catalysis & applied catalysis	288	£41,348,790.00
9	software engineering	279	£35,721,229.00
10	surfaces & interfaces	272	£64,912,950.00
11	algebra & geometry	268	£14,900,406.00
12	eng. dynamics & tribology	268	£29,145,433.00
13	optoelect. devices & circuits	264	£105,673,619.00
14	chemical structure	253	£40,453,029.00
15	combustion	230	£25,241,206.00
16	networks & distributed systems	228	£28,072,961.00
17	image & vision computing	227	£31,233,662.00
18	atoms & ions	224	£46,364,062.00
19	mathematical analysis	212	£10,058,459.00
20	biological & medicinal chem.	211	£25,235,606.00
21	design & testing technology	203	£41,945,562.00
22	design engineering	201	£36,814,905.00
23	fundamentals of computing	197	£21,206,545.00
24	non-linear systems mathematics	196	£14,789,767.00
25	building ops & management	190	£17,788,250.00
26	materials testing & eng.	188	£28,185,972.00
27	asymmetric chemistry	187	£12,313,075.00
28	transport ops & management	185	£16,336,183.00
29	rf & microwave technology	184	£31,149,929.00

**Table 1.23:** Continued from previous page.

No.	Topic	Number of Grants	Value of Grants
30	lasers & optics	183	£40,701,092.00
31	digital signal processing	182	£22,004,380.00
32	complex fluids & soft solids	181	£25,507,581.00

**Table 1.29:** Topics clustered within each community and sub-community discovered as a result of applying the Louvain community detection algorithm to the *Topic-grant* network constructed using the historical (1990 to 2000) data set. Six of the row names are abbreviated: **C1** stands for Community 1, **C2** for Community 2 and so on. Rows representing sub-communities of a community are named using second-level labels (1.1, 1.2, 2.1, 2.2 and so on).

<b>C1</b>	<b>1.1</b>	acoustics, intelligent measurement sys., aerodynamics
	<b>1.2</b>	coal technology, energy - conventional, combustion, safety & reliability of plant
	<b>1.3</b>	bioprocess engineering, heat & mass transfer, cells, multiphase flow, complex fluids & soft solids, particle technology, design of process systems, reactor engineering, fluid dynamics, rheology
	<b>1.4</b>	building ops & management, transport ops & management, computer graphics & visual., urban & land management, energy efficiency, wind power, intelligent & expert systems
	<b>1.5</b>	bioenergy, waste minimisation, waste management, water engineering
<b>C2</b>	<b>2.1</b>	condensed matter physics, materials synthesis & growth, magnetism/magnetic phenomena, quantum fluids & solids, materials characterisation, solar technology, materials processing, sustainable energy networks
	<b>2.2</b>	displays, optoelect. devices & circuits, electronic devices & subsys., power electronics, microsystems, system on chip, optical communications, vlsi design, optical devices & subsystems
	<b>2.3</b>	atoms & ions, optical phenomena, cold atomic species, plasmas - laser & fusion, lasers & optics, quantum optics & information, light-matter interactions, scattering & spectroscopy
<b>C3</b>	<b>3.1</b>	development (biosciences), modelling & simul. of it sys., drug formulation & delivery, theoretical biology
	<b>3.2</b>	algebra & geometry, mathematical analysis, fundamentals of computing, mathematical physics
	<b>3.3</b>	continuum mechanics, numerical analysis, logic & combinatorics, parallel computing, mathematical aspects of or, population ecology, medical science & disease, statistics & appl. probability, non-linear systems mathematics
<b>C4</b>	<b>4.1</b>	control engineering, manufacturing machine & plant, electric motor & drive systems, mech. & fluid power transmiss.

**Table 1.29:** Continued from previous page.

	<b>4.2</b>	bioelectronic devices, mobile computing, cognitive science appl. in ict, multimedia, digital signal processing, networks & distributed systems, electromagnetics, rf & microwave technology, human communication in ict, vision & senses - ict appl., human-computer interactions
	<b>4.3</b>	assess/remediate contamination, ground engineering, civil engineering materials, materials testing & eng., coastal & waterway engineering, music & acoustic technology, energy - nuclear, oil & gas extraction, eng. dynamics & tribology, pavement engineering
	<b>4.4</b>	construction ops & management, manufact. business strategy, design & testing technology, manufact. enterprise ops& mgmt, design engineering, nuclear structure, design processes, software engineering, information & knowledge mgmt
	<b>4.5</b>	artificial intelligence, tools for the biosciences, image & vision computing, underwater engineering, robotics & autonomy
<b>C5</b>	<b>5.1</b>	biological & medicinal chem., chemical synthetic methodology, catalysis & enzymology, co-ordination chemistry, chemical biology, gas & solution phase reactions, chemical structure, physical organic chemistry
	<b>5.2</b>	asymmetric chemistry, catalysis & applied catalysis, carbohydrate chemistry, combinatorial chemistry
	<b>5.3</b>	analytical science, plasmas - technological, instrumentation eng. & dev., surfaces & interfaces
	<b>5.4</b>	biomaterials, power systems plant, med.instrument.device& equip., tissue engineering, power sys man, prot & control
	<b>5.5</b>	electrochemical science & eng., mining & minerals extraction, energy storage, separation processes, fuel cell technologies, sustainable energy vectors

## 1.1.2 Topic-researcher network

### 1.1.2.1 Current (2010 to 2016) data set

**Table 1.30:** Topics and the number of researchers that contain each topic sorted by the number of researchers (largest to smallest) in the *Topic-researcher* network constructed using the current (2010 to 2016) data set

No.	Topic	Number of Researchers
1	manufacturing machine & plant	585
2	materials characterisation	551
3	materials synthesis & growth	539
4	med.instrument.device& equip.	479
5	information & knowledge mgmt	456
6	energy efficiency	406
7	human-computer interactions	387
8	artificial intelligence	376
9	networks & distributed systems	345
10	statistics & appl. probability	333
11	materials processing	319
12	fundamentals of computing	311
13	manufact. enterprise ops& mgmt	282
14	sustainable energy networks	282
15	catalysis & applied catalysis	281
16	urban & land management	230
17	algebra & geometry	226
18	energy storage	221
19	image & vision computing	221
20	numerical analysis	218
21	electronic devices & subsys.	215
22	robotics & autonomy	215
23	biomaterials	211
24	non-linear systems mathematics	209
25	medical imaging	206
26	energy - nuclear	198
27	optoelect. devices & circuits	198

**Table 1.30:** Continued from previous page.

No.	Topic	Number of Researchers
28	analytical science	197
29	complexity science	194

<b>Walktrap</b>	13	0.151	15	0.186
<b>Fast Greedy</b>	3	0.184	3	0.218
<b>Edge Betweenness</b>	174	0.024	176	0.024

**Table 1.33:** Number of topics clustered within each community discovered as a result of applying several community detection algorithms to the *Topic-researcher* network constructed using the current (2010 to 2016) data set. Five of the column names are abbreviated: **C1** stands for Community 1, **C2** for Community 2 and so on. Three of the row names are abbreviated: **uw** and **wnn** stand for unweighted and weighted by normalized number of grants, respectively.

		<b>C1</b>	<b>C2</b>	<b>C3</b>	<b>C4</b>	<b>C5</b>
<b>uw</b>	<b>Spinglass</b>	42	1	60	88	34
	<b>Louvain</b>	40	34	59	92	-
	<b>Fast Greedy</b>	112	12	101	-	-
<b>wnn</b>	<b>Spinglass</b>	1	34	46	58	86
	<b>Louvain</b>	39	62	15	109	-
	<b>Fast Greedy</b>	92	40	93	-	-

**Table 1.34:** Topics clustered within each community and sub-community discovered as a result of applying the Louvain community detection algorithm to the *Topic-researcher* network constructed using the current (2010 to 2016) data set. Six of the row names are abbreviated: **C1** stands for Community 1, **C2** for Community 2 and so on. Rows representing sub-communities of a community are named using second-level labels (1.1, 1.2, 2.1, 2.2 and so on).

<b>C1</b>	<b>1.1</b>	building ops & management, manufact. business strategy, civil engineering materials, pavement engineering, construction ops & management, robotics & autonomy, design & testing technology, soil science, earth engineering, structural engineering, environmental economics, survey & monitoring, geo-hazards, waste management, ground engineering, wind power
	<b>1.2</b>	animal organisms, environment & health, climate & climate change, food processing, coastal & waterway engineering, land - ocean interactions, earth & environmental, water engineering, energy - marine & hydropower
	<b>1.3</b>	aerodynamics, intelligent measurement sys., complexity science, management & business studies, education, social stats., comp. & methods, energy efficiency, sociology, environmental planning, sustainable energy networks, human geography (general), transport ops & management, intelligent & expert systems, urban & land management
<b>C2</b>	<b>2.1</b>	cognitive psychology, information & knowledge mgmt, comput./corpus linguistics, marketing, computational linguistics, mental health, design processes, mobile computing, developmental psychology, psychology, human communication in ict, social theory, human-computer interactions
	<b>2.2</b>	behavioural & experimental eco, mathematical & statistic psych, criminal law & criminology, media & communication studies, criminology, modelling & simul. of it sys., governance, organisational studies, international law, social policy, knowledge management, social psychology
	<b>2.3</b>	bioinformatics, design engineering, biomedical neuroscience, new & emerging comp. paradigms, cognitive science appl. in ict, research approaches, control engineering, vision & senses - ict appl.
	<b>2.4</b>	computer sys. & architecture, parallel computing, data handling & storage, political geography, fundamentals of computing, product design, industrial-org/occupational, software engineering, international relations theory, underwater engineering, networks & distributed systems, vlsi design

**Table 1.34:** Continued from previous page.

	<b>2.5</b>	animal behaviour, macroeconomics, applied arts htp, multimedia, artificial intelligence, music & acoustic technology, composition, musical performance, computer graphics & visual., new media/web-based studies, digital art & design, science & technology studies, digital arts htp, social anthropology, digital signal processing, time-based media htp, image & vision computing
<b>C3</b>	<b>3.1</b>	genomics, theoretical biology
	<b>2.2</b>	algebra & geometry, non-linear systems mathematics, continuum mechanics, numerical analysis, logic & combinatorics, regional & extreme weather, mathematical analysis, statistics & appl. probability, mathematical physics
	<b>2.3</b>	acoustics, microeconomic theory, mathematical aspects of or, rheology
<b>C4</b>	<b>4.1</b>	ageing: chemistry/biochemistry, magnetism/magnetic phenomena, analytical science, materials characterisation, atoms & ions, materials synthesis & growth, bioelectronic devices, optical communications, biological membranes, optical devices & subsystems, biomedical sciences, optical phenomena, bionanoscience, optoelect. devices & circuits, biophysics, plant physiology, carbohydrate chemistry, plant responses to environment, chemical structure, pollution, cold atomic species, quantum fluids & solids, complex fluids & soft solids, quantum optics & information, condensed matter physics, rf & microwave technology, displays, scattering & spectroscopy, electronic devices & subsys., solar technology, evolution & populations, surfaces & interfaces, high performance computing, system on chip, lasers & optics, tools for the biosciences, light-matter interactions
	<b>4.2</b>	accelerator r&d, fuel cell technologies, assess/remediate contamination, fusion, bioenergy, instrumentation eng. & dev., carbon capture & storage, manufact. enterprise ops& mgmt, coal technology, manufacturing machine & plant, combustion, materials processing, computational methods & tools, materials testing & eng., development geography, mech. & fluid power transmiss., economics, oil & gas extraction, electric motor & drive systems, plasmas - laser & fusion, electromagnetics, plasmas - technological, energy - conventional, power sys man, prot & control, energy - nuclear, power systems plant, energy storage, sustainable energy vectors, eng. dynamics & tribology, waste minimisation, food structure/composition

**Table 1.34:** Continued from previous page.

	<b>4.3</b>	asymmetric chemistry, gas & solution phase reactions, biochemical engineering, heat & mass transfer, bioprocess engineering, macro-molecular delivery, catalysis & applied catalysis, microsystems, chemical biology, multiphase flow, chemical synthetic methodology, particle technology, co-ordination chemistry, physical organic chemistry, design of process systems, protein engineering, diamond light source, reactor engineering, electrochemical science & eng., separation processes, fluid dynamics, synthetic biology
	<b>4.4</b>	biological & medicinal chem., microbiology, biomaterials, novel industrial products, biomechanics & rehabilitation, population ecology, catalysis & enzymology, power electronics, cells, protein chemistry, development (biosciences), protein folding / misfolding, drug formulation & delivery, structural biology, med.instrument.device& equip., systems neuroscience, medical imaging, tissue engineering, medical science & disease

## 1.2 Networks of Researchers

### 1.2.1 Researcher-grant network

#### 1.2.1.1 Current (2010 to 2016) data set

**Table 1.35:** Researchers and the number and value of grants that contain each researcher sorted by the number of grants (largest to smallest) in the *Researcher-grant* network constructed using the current (1999 to 2000) data set

No.	Researcher	Number of Grants	Value of Grants
1	shah, professor n	17	£47,400,865.00
2	strbac, professor g	14	£44,253,425.00
3	catlow, professor r	13	£22,639,433.00
4	brett, professor d	13	£27,534,461.00
5	brandon, professor np	12	£34,376,882.00
6	pourkashanian, professor m	11	£24,656,331.00
7	parkin, professor ip	11	£18,658,044.00
8	preuss, professor m	11	£30,016,963.00
9	green, professor t	10	£15,917,626.00
10	grey, professor cp	10	£33,576,941.00
11	ding, professor y	10	£20,636,102.00
12	grant, professor p	9	£39,993,418.00
13	davidson, professor mg	9	£29,042,839.00
14	snaith, professor hj	9	£16,777,759.00
15	hyatt, professor n	9	£22,098,466.00
16	bruce, professor p	9	£31,239,726.00
17	friend, professor sir r	8	£9,281,906.00
18	withers, professor p	8	£11,417,831.00
19	jenkins, professor n	8	£23,802,799.00
20	yang, professor g	8	£7,634,786.00
21	walls, professor jm	8	£8,557,742.00
22	snapa, professor ce	8	£20,957,431.00
23	richardson, professor dj	8	£29,690,078.00
24	roskilly, professor ap	8	£14,643,613.00
25	hardacre, professor c	7	£13,831,861.00

**Table 1.35:** Continued from previous page.

No.	Researcher	Number of Grants	Value of Grants
26	nelson, professor j	7	£11,106,484.00

**Table 1.47:** Total number and value of unique grants within communities, total number and value of unique grants within the network and total number and value of unique grants between communities discovered as a result of applying several community detection algorithms to the *Researcher-grant* network constructed using the historical (2000 to 2010) data set. Twelve of the row names are abbreviated: **uw**, **wnn** and **wnv** stand for unweighted, weighted by normalized number of grants and weighted by normalized value of grants, respectively. **SG**, **LV** and **FG** stand for the Spinglass, Louvain and Fast Greedy community detection algorithms.

		Total number and value within communities (unique)	Total number and value within network (unique)	Total number and value between communities (unique)
<b>uw</b>	<b>SG</b>	- -	- -	- -
	<b>LV</b>	1216 £743M	7430 £3.5B	6214 £2.8B
	<b>FG</b>	1001 £582M	7430 £3.5B	6429 £2.9B
	<b>SG</b>	- -	- -	- -
	<b>LV</b>	866 £551M	7430 £3.5B	6564 £2.9B
	<b>FG</b>	943 £573M	7430 £3.5B	6487 £2.9B
<b>wnv</b>	<b>SG</b>	- -	- -	- -
	<b>LV</b>	861 £484M	7430 £3.5B	6569 £3B
	<b>FG</b>	987 £597M	7430 £3.5B	6443 £2.9B

### 1.2.1.3 Historical (1990 to 2000) data set

**Table 1.48:** Researchers and the number and value of grants that contain each researcher sorted by the number of grants (largest to smallest) in the *Researcher-grant* network constructed using the current (2000 to 2010) data set

No.	Researcher	Number of Grants	Value of Grants
1	wilkinson, professor c	36	£21,776,088.00
2	white, professor i	36	£4,409,051.00
3	catlow, professor r	35	£4,680,161.00
4	penty, professor r	33	£4,317,771.00
5	sibbett, professor w	32	£5,012,991.00
6	friend, professor sir r	31	£3,537,803.00
7	skolnick, professor m	31	£15,291,045.00
8	roberts, professor kj	29	£2,070,143.00
9	weston, professor r	28	£4,454,242.00
10	hutchings, professor g	28	£2,972,177.00
11	bradley, professor ddc	27	£3,498,465.00
12	cowley, professor r	25	£4,010,571.00
13	marsh, professor jh	25	£13,195,584.00
14	ryan, professor a	24	£4,389,162.00
15	bochmann, professor m	24	£1,947,607.00
16	ward, professor im	23	£3,097,074.00
17	holmes, professor ab	23	£30,824,314.00
18	kendall, professor k	22	£2,037,526.00
19	mcdonald, professor m	22	£1,605,069.00
20	chantrell, professor rw	22	£1,350,294.00
21	stanley, professor c	22	£20,775,879.00
22	greated, professor c	22	£2,152,753.00
23	sealy, professor b	22	£12,115,597.00
24	edmunds, professor d	22	£168,669.00
25	scott, professor k	22	£2,597,790.00
26	riffat, professor s	22	£2,221,680.00
27	abell, professor js	21	£11,008,511.00
28	aitchison, professor s	21	£7,799,336.00

<b>Edge Betweenness</b>	-	-	-	-	-	-

**Table 1.51:** Number of researchers clustered within each community discovered as a result of applying several community detection algorithms to the *Researcher-grant* network constructed using the historical (1990 to 2000) data set. Four of the column names are abbreviated: **C1** stands for Community 1, **C2** for Community 2 and so on. Three of the row names are abbreviated: **uw**, **wnn** and **wnv** stand for unweighted, weighted by normalized number of grants and weighted by normalized value of grants, respectively.

		<b>C1</b>	<b>C2</b>	<b>C3</b>	<b>C4</b>	<b>C5</b>
<b>uw</b>	<b>Spinglass</b>	-	-	-	-	-
	<b>Louvain</b>	31	21	30	35	46
	<b>Fast Greedy</b>	45	30	21	46	35
<b>wnn</b>	<b>Spinglass</b>	-	-	-	-	-
	<b>Louvain</b>	31	21	46	35	30
	<b>Fast Greedy</b>	30	21	31	46	35
<b>wnv</b>	<b>Spinglass</b>	-	-	-	-	-
	<b>Louvain</b>	28	21	46	30	35
	<b>Fast Greedy</b>	-	-	-	-	-

**Table 1.52:** Number and value of grants within each community discovered as a result of applying several community detection algorithms to the *Researcher-grant* network constructed using the historical (1990 to 2000) data set. The number of grants includes duplicate grants, as a grant can be part of more than one community. Subsequently, the value of grants also includes the duplicate grants. Six of the column names are abbreviated: **C1** stands for Community 1, **C2** for Community 2 and so on. Twelve of the row names are abbreviated: **uw**, **wnn** and **wnv** stand for unweighted, weighted by normalized number of grants and weighted by normalized value of grants, respectively. **SG**, **LV** and **FG** stand for the Spinglass, Louvain and Fast Greedy community detection algorithms.

		<b>C1</b>	<b>C2</b>	<b>C3</b>	<b>C4</b>	<b>C5</b>	<b>Total</b>
<b>uw</b>	<b>SG</b>	-	-	-	-	-	-
	<b>LV</b>	115 £34M	78 £18M	129 £17M	147 £41M	150 £21M	619 £132M

**Table 1.57:** Number of researchers clustered within each community discovered as a result of applying several community detection algorithms to the *Researcher-topic* network constructed using the current (2010 to 2016) data set. Eight of the column names are abbreviated: **C1** stands for Community 1, **C2** for Community 2 and so on. Three of the row names are abbreviated: **uw** and **wnn** stand for unweighted and weighted by normalized number of grants, respectively.

		<b>C1</b>	<b>C2</b>	<b>C3</b>	<b>C4</b>	<b>C5</b>	<b>C6</b>	<b>C7</b>	<b>C8</b>
